

## Air Traffic Management

### SESAR and Future ATM Development Projects

**Friday 12<sup>th</sup> December 2008**

**08:30hrs to 14:00hrs**

**RAF Club, Piccadilly, London, UK**

This breakfast, forum and luncheon will serve as the finale to the ATM KN's efforts in 2008 by providing an opportunity for UK industry and academia to be updated on and focus upon the large development projects driving forward ATM today.

- The Single European Sky Air Traffic Management Research (**SESAR**) programme will form the centrepiece of the discussions - opportunities offered by the largest ever European ATM development project will be examined and explained by its **Chief Technical Architect, Mr Peter Hotham**. New insights into the programme will be offered following the official formal launch of the SESAR "Joint Undertaking" on 8<sup>th</sup> December 2008.
- The US equivalent of SESAR, the "Next Generation Air Transportation System" (or simply '**NextGen**') will also be represented at the event **by Mr Donald Ward** who leads the NextGen/SESAR interoperability efforts for the Federal Aviation Administration (FAA).
- The UK's **National Air Traffic Services (NATS)** have also agreed to participate and will take the opportunity to give their perspective on SESAR. Their views will be presented by **Mr Andrew Dobson**, the Senior Programme Manager for the SESAR programme at NATS.

The political and technical dimensions of the project will both be explored, including how SESAR is changing ATM to create the Single European Sky and what new technology will be required to deliver it.

Hosted by SEEDA (South East England Development Agency) and supported by both The Aerospace and Defence Knowledge Transfer Network and the Farnborough Aerospace Consortium (FAC), the provisional agenda promises to be a truly landmark event.

#### *Agenda*

08:30	Arrival, Registration & Networking Breakfast Refreshments
09:00	Welcome - FAC & Helios
09:10	Speaker Presentations
10:30	Coffee Break & Networking Refreshments
11:00	Speaker Presentations
12:30	Networking Luncheon
