### ATM and the Environment: Developing Solutions

Wednesday 22<sup>nd</sup> October 2008

14:30hrs to 18:00hrs

BAE Systems, Park Centre, Farnborough, Hampshire

Implementing environmentally friendly aircraft operations has recently emerged as one of the most important roles for the ATM industry. This seminar will take in the views of key industrial stakeholders, examine the latest research taking place in the field and look at initiatives aimed at taking innovative ideas through into implemented concepts.

The principal aim of the event is to gather together key members of the ATM and Sustainable Aviation communities and to provide them with an opportunity to explore opportunities in this domain. Confirmed speakers include Cambridge University, the SBAC (Society of British Aerospace Companies) and Rolls-Royce. A particular focus will be placed upon discussing domestic and pan-European projects, such as the European Clean Sky and SESAR (Single European Sky ATM Research) initiatives.
