

Air Traffic Management

ATM, Security and Autonomous Systems & The Airport of the Future

Thursday 28th February 2008
13:30-19:30

BAE Park Centre, Aerospace Centre, Aerospace Boulevard, Farnborough, Hampshire.
GU14 6YU.

Modern airports are complex and dynamic systems that incorporate a varied range of interacting sub-systems that each present their own challenges to successful operation. Increasingly both landside and airside operations require input from a number of specialist domains and an efficient system-wide integration/management approach in order to meet growing demands in terms of capacity, security, safety and the environment.

Bringing ATM, Security and Autonomous Systems together

The interaction of ATM, Security and Autonomous systems is vital to every airport in existence today. As such, the ATM, Security and Autonomous Systems Knowledge Networks have, with the support of the Farnborough Aerospace Consortium, joined forces to bring the three domains together.

A platform for cross-domain networking and collaboration

The 'Airport of the Future' event aims to provide a platform for cross-domain networking and collaboration building. The ultimate goal is to develop innovative ideas into new commercial products, based on a system wide understanding of airport operations.

Presenting the latest work and future goals to industry

During the day academic and industrial speakers from the three domains will present their latest work and future goals to an assembled audience of key industrial stakeholders and leading UK academics. There will be regular opportunities to interact with speakers and fellow delegates in order to build lasting and mutually beneficial relationships.

Reserve your delegate place now!

We recommend you reserve your delegate places as soon as possible by replying to this e-mail. The cost of the event - inclusive of light refreshments and drinks - is only £75 + VAT for FAC & Network members and £95 + VAT for non-members.

Places are to be allocated on a 'first come, first served' basis with up to 3 delegate applications per company. FAC and Network members will get first refusal before non-members are invited from the wider database.

Places can be reserved by replying to this e-mail ASAP and confirming the names and job titles of those wishing to attend to events@fac.org.uk.

Please provide telephone/e-mail contact/invoice address details when you apply for your delegate places. Confirmation of delegate acceptance will be given by e-mail along with a final agenda, map, parking and joining instructions.
